

# SafeBreach-as-a-Service

## All the Benefits of SafeBreach Without Managing the Platform

The pioneer in breach and attack simulation (BAS), SafeBreach is the most widely used continuous security validation platform. Designed to provide a “hacker’s view” of an organization’s security posture, the platform enables organizations to continuously and safely execute attacks, validate and optimize the efficacy of their security controls, and prioritize remediation efforts to mitigate the most critical gaps before breaches occur.

**SafeBreach-as-a-Service is the complete solution, combining platform licenses with on-going services. SafeBreach-as-a-Service enables you to:**

### Accelerate Time to Value

Depending on priorities and the size of your team, some organizations may not have the bandwidth to successfully deploy new solutions and integrate with their security stack. SafeBreach-as-a-Service accelerates time to value, allowing you to see actionable insights within first few weeks of onboarding.

### Strengthen Your Security Posture

Every company has its unique set of needs and to ensure you are focusing on what’s important we will set a baseline for your risk and map out a plan of action. Your dedicated services team will create custom attack plans, attacks, remediation steps, reporting, and dashboards, allowing you to focus on strategy, remediation, mitigation, and standards creation.

### Validate Your Security Investments and Hold Vendors Accountable

On average enterprises deploy 75 cybersecurity-related tools on their networks. Your dedicated team will help you to accurately identify security gaps not covered by existing solutions. The team will also run assessments to test whether deployed solutions meet the threshold of risk established in vendor contracts, helping you to prioritize your investments.

### Quantify Business Impact

The reports generated by SafeBreach Services, allow you to confidently communicate to key stakeholders with clear KPIs, quantify risk, and prioritize investments that are aligned with the business.

### Why SafeBreach-as-a-Service

Dedicated Customer Success Manager and Solutions Architect

Simple deployment

Custom attack creation, attack plan building, and report creation

Ongoing platform management, remediation guidance & recommendations

BAS strategy refinement and execution
